Important

Feedback is welcome. Please write us at ces.qwi.feedback@census.gov.

1. Purpose

The public-use data from the Longitudinal Employer-Household Dynamics Program, including the Quarterly Workforce Indicators (QWI) and Job-to-Job Flows (J2J), are available for download with the following data schema. These data are available through the LEHD website's Data page at <https://lehd.ces.census.gov/data/> and through the LED Extraction Tool at <https://ledextract.ces.census.gov/>.

This document describes the data schema for LEHD files. LEHD-provided SHP files are separately described in [lehd_shapefiles.pdf](#). For each variable, a set of allowable values is defined. Definitions are provided as CSV files, with header variable definitions. Changes relative to the original v4.0 version are listed [at the end](#).

2. File naming

The naming conventions of the data files is documented in [lehd_csv_naming.pdf](#).

3. Extends

This version reimplements some features from V4.0. Many files compliant with LEHD or QWI Schema v4.0 will also be compliant with this schema, but compatibility is not guaranteed.

4. Supersedes

This version supersedes V4.6.0, for files released as of R2020Q1.

5. Basic Schema

Each data file is structured as a CSV file. The first columns contain [\[identifiers\]](#), subsequent columns contain [\[indicators\]](#), followed by [status flags](#). In some cases, visually formatted Excel (XLSX) files are also available, containing the same information together with header lines on each sheet.

5.1. Generic structure

Column name
[Identifier1]
[Identifier2]
[Identifier3]
[...]
[Indicator 1]
[Indicator 2]
[Indicator 3]
[...]
[Status Flag 1]
[Status Flag 2]
[Status Flag 3]
[...]

Note: A full list of indicators for each type of file are shown below in the [Indicators](#) section. While all indicators are included in the CSV files, only the requested indicators will be included in data outputs from the LED Extraction Tool.

5.2. Identifiers

Records, unless otherwise noted, are parts of time-series data. Unique record identifiers are noted below, by file type. Identifiers without the year and quarter component can be considered a series identifier.

5.2.1. Mapping for Identifiers

([lehd_mapping_identifiers.csv](#))

Each of the released files has a set of variables uniquely identifying records ('Identifiers'). The table below relates the set of identifier specifications to the released files. The actual CSV files containing the identifiers for each set are listed after this table. Each identifier can take on a specified list of values, documented in the section on [Categorical Variables](#).

identifiers	QWI	NQWI	J2J	J2JR	J2JOD	PSEO E	PSEO F	LODE S
lehd_identifiers_qwi	1	1						
lehd_identifiers_j2j			1	1				
lehd_identifiers_j2jod					1			
lehd_identifiers_pseo						1	1	

5.2.2. Identifiers for qwi

([lehd_identifiers_qwi.csv](#))

Variable	Type	label
periodicity	Char(1)	Periodicity of report
seasonadj	Char(1)	Seasonal Adjustment Indicator
geo_level	Char(1)	Group: Geographic level of aggregation
geography	Char(8)	Group: Geography code
ind_level	Char(1)	Group: Industry level of aggregation
industry	Char(5)	Group: Industry code
ownercode	Char(3)	Group: Ownership group code
sex	Char(1)	Group: Gender code
agegrp	Char(3)	Group: Age group code (WIA)
race	Char(2)	Group: race
ethnicity	Char(2)	Group: ethnicity
education	Char(2)	Group: education
firmage	Char(1)	Group: Firm Age group
firmsize	Char(1)	Group: Firm Size group
year	Num	Time: Year
quarter	Num	Time: Quarter

5.2.3. Identifiers for j2j

([lehd_identifiers_j2j.csv](#))

Variable	Type	label
periodicity	Char(1)	Periodicity of report
seasonadj	Char(1)	Seasonal Adjustment Indicator
geo_level	Char(1)	Group: Geographic level of aggregation
geography	Char(8)	Group: Geography code
ind_level	Char(1)	Group: Industry level of aggregation
industry	Char(5)	Group: Industry code
ownercode	Char(3)	Group: Ownership group code
sex	Char(1)	Group: Gender code
agegrp	Char(3)	Group: Age group code (WIA)
race	Char(2)	Group: race
ethnicity	Char(2)	Group: ethnicity
education	Char(2)	Group: education
firmage	Char(1)	Group: Firm Age group
firmsize	Char(1)	Group: Firm Size group
year	Num	Time: Year
quarter	Num	Time: Quarter
agg_level	Num	Aggregation Level Indicator

5.2.4. Identifiers for j2jod

([lehd_identifiers_j2jod.csv](#))

Variable	Type	label
periodicity	Char(1)	Periodicity of report
seasonadj	Char(1)	Seasonal Adjustment Indicator
geo_level	Char(1)	Group: Geographic level of aggregation of destination job
geography	Char(8)	Group: Geography code of destination job
ind_level	Char(1)	Group: Industry level of aggregation of destination job
industry	Char(5)	Group: Industry code of destination job
ownercode	Char(3)	Group: Ownership group code of destination job
sex	Char(1)	Group: Gender code
agegrp	Char(3)	Group: Age group code (WIA)
race	Char(2)	Group: race
ethnicity	Char(2)	Group: ethnicity
education	Char(2)	Group: education
firmage	Char(1)	Group: Firm Age group
firmsize	Char(1)	Group: Firm Size group
year	Num	Time: Year
quarter	Num	Time: Quarter
agg_level	Num	Aggregation Level Indicator
geo_level_orig	Char(1)	Group: Geographic level of aggregation of origin job
geography_orig	Char(8)	Group: Geography code of origin job
ind_level_orig	Char(1)	Group: Industry level of aggregation of origin job
industry_orig	Char(5)	Group: Industry code of origin job
ownercode_orig	Char(3)	Group: Ownership group code of origin job
firmage_orig	Char(1)	Group: Firm Age group of origin job
firmsize_orig	Char(1)	Group: Firm Size group of origin job

5.2.5. Identifiers for pseo

([lehd_identifiers_pseo.csv](#))

Variable	Type	label
agg_level_pseo	Numeric	Aggregation level
inst_level	Char(1)	Tabulation level of the institution
institution	Char(6)	Place of the institution
degree_level	Char(2)	Degree level code
cip_level	Char(1)	Degree field level of aggregation
cipcode	Char(7)	Degree field
grad_cohort	Char(4)	First year of graduation cohort (YYYY) - All Cohorts 0000
grad_cohort_years	Numeric	Number of years in graduation cohort
geo_level	Char(1)	Group: Geographic level of employment
geography	Char(8)	Group: Geography code of employment
ind_level	Char(1)	Group: Industry level of employment
industry	Char(5)	Group: Industry code of employment

5.3. Indicators

The following tables and associated mapping files list the indicators available on each file. The descriptor files themselves are structured as follows:

- The "Indicator Variable" is the short name of the variable on the CSV files, suitable for machine processing in a wide variety of statistical applications.
- When given, the "Alternate name" may appear in related documentation and articles.
- The "Status Flag" is used to indicate publication or data quality status (see [Status Flags](#)).
- The "Indicator Name" is a non-abbreviated version of the "Indicator Variable".
- The "Description" provides more verbose description of the variable.
- "Units" identify the type of variable according to a very simplified taxonomy (not formalized yet): counts, rates, monetary amounts.
- "Concept" classifies the variables into higher-level concepts. The taxonomy for these concepts has not been finalized yet, see [label_concept_draft.csv](#) for a draft version.
- The "Base" indicates the denominator used to compute the statistic, and may be '1'.

5.3.1. National QWI and state-level QWI

([variables_qwi.csv](#))

Indicator Variable	Alternate Name	Status Flag	Indicator Name	Description	Units	Concept	Base
Emp	B	sEmp	Beginning-of-Quarter Employment	Estimate of the total number of jobs on the first day of the reference quarter	Count	Employment	1
EmpEnd	E	sEmpEnd	End-of-Quarter Employment	Estimate of the number of jobs on the last day of the quarter	Count	Employment	1
EmpS	F	sEmpS	Full-Quarter Employment (Stable)	Estimate of stable jobs - the number of jobs that are held on both the first and last day of the quarter with the same employer	Count	Employment	1

Indicator or Variable	Alternate Name	Status Flag	Indicator Name	Description	Units	Concept	Base
EmpTotal	M	sEmpTotal	Employment - Reference Quarter	Estimated count of people employed in a firm at any time during the quarter	Count	Employment	1
EmpSpv	Fpv	sEmpSpv	Full-Quarter Employment in the Previous Quarter	Estimate of stable jobs in the quarter before the reference quarter	Count	Employment	1
HirA	A	sHirA	Hires (All Accessions)	Estimated number of workers who started a new job in the specified quarter	Count	Hire	1
HirN	H	sHirN	New Hires	Estimated number of workers who started a new job excluding recall hires	Count	Hire	1
HirR	R	sHirR	Recall Hires	Estimated number of workers who returned to the same employer where they had worked within the previous year	Count	Hire	1
Sep	S	sSep	Separations (All)	Estimated number of workers whose job with a given employer ended in the specified quarter	Count	Separation	1
HirAEnd	CA	sHirAEnd	End-of-Quarter Hires	Estimated number of workers who started a new job in the specified quarter, which continued into next quarter	Count	Hire	1

Indicator or Variable	Alternate Name	Status Flag	Indicator Name	Description	Units	Concept	Base
SepBeg	CS	sSepBeg	Beginning-of-Quarter Separations	Estimated number of workers whose job in the previous quarter continued and ended in the given quarter	Count	Separation	1
HirAEndRepl	EI	sHirAEndRepl	Replacement Hires	Hires into continuous quarter employment in excess of job creation	Count	Hire	1
HirAEndR	CAR	sHirAEndR	End-of-Quarter Hiring Rate	Hires as a percent of average employment	Rate	Hire	$(\text{Emp} + \text{EmpEnd})/2$
SepBegR	CSR	sSepBegR	Beginning-of-Quarter Separation Rate	Separations as a percent of average employment	Rate	Separation	$(\text{Emp} + \text{EmpEnd})/2$
HirAEndReplR	EIR	sHirAEndReplR	Replacement Hiring Rate	Replacement hires as a percent of the average of beginning- and end-of-quarter employment	Rate	Hire	$(\text{Emp} + \text{EmpEnd})/2$
HirAS	FA	sHirAS	Hires (All Hires into Full-Quarter Employment)	Estimated number of workers that started a job that lasted at least one full quarter with a given employer	Count	Hire	1

Indicator Variable	Alternate Name	Status Flag	Indicator Name	Description	Units	Concept	Base
HirNS	FH	sHirNS	New Hires (New Hires into Full-Quarter Employment)	Estimated number of workers who started a job that they had not held within the past year and the job turned into a job that lasted at least a full quarter with a given employer	Count	Hire	1
SepS	FS	sSepS	Separations (Flows out of Full-Quarter Employment)	Estimated number of workers who had a job for at least a full quarter and then the job ended	Count	Separation	1
SepSnx	FSnx	sSepSnx	Separations in the Next Quarter (Flows out of Full-Quarter Employment)	Estimated number of workers in the next quarter who had a job for at least a full quarter and then the job ended	Count	Separation	1
TurnOverS	FT	sTurnOverS	Turnover (Stable)	The rate at which stable jobs begin and end	Rate	Turnover	2*EmpS
FrmJbGn	JC	sFrmJbGn	Firm Job Gains (Job Creation)	Estimated number of jobs gained at firms throughout the quarter	Count	Job Flows	1
FrmJbLs	JD	sFrmJbLs	Firm Job Loss (Job Destruction)	Estimated number of jobs lost at firms throughout the quarter	Count	Job Flows	1
FrmJbC	JF	sFrmJbC	Firm Job Change (Net Change)	Difference between firm job gain and firm job loss	Count	Job Flows	1
FrmJbGnS	FJC	sFrmJbGnS	Firm Job Gains (Stable)	Estimated number of full-quarter jobs gained at firms	Count	Job Flows	1

Indicator Variable	Alternate Name	Status Flag	Indicator Name	Description	Units	Concept	Base
FrmJbLsS	FJD	sFrmJbLsS	Firm Job Loss (Stable)	Estimated number of full-quarter jobs lost at firms	Count	Job Flows	1
FrmJbCS	FJF	sFrmJbCS	Firm Job Change (Stable; Net Change)	Net growth in jobs that last a full quarter	Count	Job Flows	1
EarnS	ZW3	sEarnS	Average Monthly Earnings (Full-Quarter Employment)	Average monthly earnings of employees with stable jobs	Dollars	Earnings	EmpS
EarnBeg	ZW2B	sEarnBeg	Average Monthly Earnings (Beginning-of-Quarter Employment)	Average monthly earnings of employees who worked on the first day of the reference quarter	Dollars	Earnings	Emp
EarnHirAS	ZWFA	sEarnHirAS	Average Monthly Earnings (All Hires into Full-Quarter Employment)	Average monthly earnings for workers who started a job that turned into a job lasting a full quarter	Dollars	Earnings	HirAS
EarnHirNS	ZWFH	sEarnHirNS	Average Monthly Earnings (New Hires into Full-Quarter Employment)	Average monthly earnings of newly stable employees	Dollars	Earnings	HirNS
EarnSepS	ZWFS	sEarnSepS	Average Monthly Earnings (Flows out of Full-Quarter Employment)	Average monthly earnings of separations from full-quarter status at an establishment	Dollars	Earnings	SepSnx
Payroll	W1	sPayroll	Total Quarterly Payroll	Total quarterly payroll for all jobs	Dollars	Earnings	1

5.3.2. National QWI and state-level QWI rates

Rates are computed from published data, and are provided as a convenience.

([variables_qwir.csv](#))

Indicator or Variable	Alternate Name	Status Flag	Indicator Name	Description	Units	Concept	Base
HirAR	AR	sHirAR	Hiring Rate (All Accessions)	All accessions as a percent of average employment	Rate	Hire	$(\text{Emp} + \text{EmpEnd})/2$
HirNR	HR	sHirNR	New Hiring Rate	New hires as a percent of average employment	Rate	Hire	$(\text{Emp} + \text{EmpEnd})/2$
HirRR	RR	sHirRR	Recall Rate	Recall hires as a percent of average employment	Rate	Hire	$(\text{Emp} + \text{EmpEnd})/2$
SepR	SR	sSepR	Separation Rate (All Separations)	All separations as a percent of average employment	Rate	Separation	$(\text{Emp} + \text{EmpEnd})/2$
HirAEndR	CAR	sHirAEndR	End-of-Quarter Hiring Rate	Hires as a percent of average employment	Rate	Hire	$(\text{Emp} + \text{EmpEnd})/2$
SepBeginR	CSR	sSepBeginR	Beginning-of-Quarter Separation Rate	Separations as a percent of average employment	Rate	Separation	$(\text{Emp} + \text{EmpEnd})/2$
HirAEndReplR	EIR	sHirAEndReplR	Replacement Hiring Rate	Replacement hires as a percent of average employment	Rate	Hire	$(\text{Emp} + \text{EmpEnd})/2$
HirASR	FAR	sHirASR	Hiring Rate (Flows into Full-Quarter Employment)	Flows into stable employment as a percent of average stable employment	Rate	Hire	$(\text{EmpSpv} + \text{EmpS})/2$
HirNSR	FHR	sHirNSR	New Hiring Rate (New Hires to Full-Quarter Status)	New hires into stable employment as a percent of average stable employment	Rate	Hire	$(\text{EmpSpv} + \text{EmpS})/2$

Indicator or Variable	Alternate Name	Status Flag	Indicator Name	Description	Units	Concept	Base
SepSR	FSR	sSepSR	Separation Rate (Flows out of Full- Quarter Employment)	Flows out of stable employment as a percent of average stable employment	Rate	Separat ion	(EmpSp v + EmpS)/ 2
SepSnx R	FSnxR	sSepSn xR	Separation Rate in the Next Quarter (Flow out of Full- Quarter Employment)	Flow rate out of stable employment in the next quarter	Rate	Separat ion	(EmpSp v + EmpS)/ 2
TurnOv rSR	FTR	sTurnO vrSR	Turnover Rate (Stable)	The rate at which stable jobs begin and end	Rate	Turnov er	2*Emp S
FrmJbG nR	JCR	sFrmJb GnR	Firm Job Gain Rate (Job Creation Rate)	Estimated number of jobs gained at firms throughout the quarter as a percent of average employment	Rate	Job Flows	(Emp + EmpEn d)/2
FrmJbL sR	JDR	sFrmJb LsR	Firm Job Loss Rate (Job Destruction Rate)	Estimated number of jobs lost at firms throughout the quarter as a percent of average employment	Rate	Job Flows	(Emp + EmpEn d)/2
FrmJbC R	JFR	sFrmJb CR	Firm Job Change Rate (Net Change Rate)	Difference between firm job gain and firm job loss as a percent of average employment	Rate	Job Flows	(Emp + EmpEn d)/2
FrmJbG nSR	FJCR	sFrmJb GnSR	Firm Job Gain Rate (Stable)	Estimated number of full-quarter jobs gained at firms as a percent of average stable employment	Rate	Job Flows	(EmpSp v + EmpS)/ 2

Indicator Variable	Alternate Name	Status Flag	Indicator Name	Description	Units	Concept	Base
FrmJbLsSR	FJDR	sFrmJbLsSR	Firm Job Loss Rate (Stable)	Estimated number of full-quarter jobs lost at firms as a percent of average stable employment	Rate	Job Flows	$(\text{EmpSpv} + \text{EmpS})/2$
FrmJbCSR	FJFR	sFrmJbCSR	Firm Job Change Rate (Stable; Net Change Rate)	Net growth in jobs that last a full quarter as a percent of average stable employment	Rate	Job Flows	$(\text{EmpSpv} + \text{EmpS})/2$

5.3.3. Job-to-job flow counts (J2J)

([variables_j2j.csv](#))

Indicator Variable	Alternate Name	Status Flag	Indicator Name	Description	Units	Concept	Base
MHire	all_dom a2	sMHire	Hires	Hires into a worker's main job	Count	Hire	1
MSep	all_dom s2	sMSep	Separations	Separations from a worker's main job	Count	Separation	1
MJobStart	first_dom me	sMJobStart	Main Job Starts	New main jobs due to hires and instances when a previously existing secondary job becomes the main source of earnings	Count	Hire	1
MJobEnd	last_dom mb	sMJobEnd	Main Job Ends	End of main jobs due to separations and instances when another job becomes the main source of earnings	Count	Separation	1
EEHire	ee_dom a2	sEEHire	Job-to-Job Hires (Continuous Employment)	Hires following a separation with no observed nonemployment spell	Count	Hire	1
EESep	ee_dom s2	sEESep	Job-to-Job Separations (Continuous Employment)	Separations followed by a hire with no observed nonemployment spell	Count	Separation	1
AQHire	aq_dom a2	sAQHire	Job-to-Job Hires (Brief Nonemployment)	Hires following a separation with a short nonemployment spell	Count	Hire	1
AQSep	aq_dom s2	sAQSep	Job-to-Job Separations (Brief Nonemployment)	Separations followed by a hire with a short nonemployment spell	Count	Separation	1

Indicator or Variable	Alternate Name	Status Flag	Indicator Name	Description	Units	Concept	Base

y10_gra ds_nme	status_y10_grads_nme	Count of Graduates Jobless or Marginally Employed in year 10	Count	Employ ment

5.4. Variability measures

The following tables and associated mapping files list the variability measures available on each file. The "Variability Measure" is the short name of the variable on the CSV files, suitable for machine processing in a wide variety of statistical applications. When given, the "Alternate Name" may appear in related documentation and articles. The "Variable Name" is a more verbose description of the variability measure.

Six variability measures are published:

- Total variability, prefixed by vt_
- Standard error, prefixed by st_, and computed as the square root of Total Variability
- Between-implicate variability, prefixed by vb_
- Average within-implicate variability, prefixed by vw_
- Degrees of freedom, prefixed by df_
- Missingness ratio, prefixed by mr_

A missing variability measure indicates a structural zero in the corresponding indicator. This is currently not associated with a flag.

5.4.1. Generic structure

6. Categorical Variables

Categorical variable descriptions are displayed above each table, with the variable name shown in parentheses. Unless otherwise stated, every possible value/label combination for each categorical variable is listed. Please note that not all values will be available in every table.

6.1. agegrp

([label_agegrp.csv](#))

agegrp	label
A00	All Ages (14-99)
A01	14-18
A02	19-21
A03	22-24
A04	25-34
A05	35-44
A06	45-54
A07	55-64
A08	65-99

6.2. education

([label_education.csv](#))

education	label
E0	All Education Categories
E1	Less than high school
E2	High school or equivalent, no college
E3	Some college or Associate degree
E4	Bachelor's degree or advanced degree
E5	Educational attainment not available (workers aged 24 or younger)

6.3. ethnicity

([label_ethnicity.csv](#))

ethnicity	label
A0	All Ethnicities
A1	Not Hispanic or Latino
A2	Hispanic or Latino

6.4. firmage

([label_firmage.csv](#))

firmage	label
0	All Firm Ages
1	0-1 Years
2	2-3 Years
3	4-5 Years
4	6-10 Years
5	11+ Years
N	Firm Age Not Available For Public-Sector Firms

6.5. firmsize

([label_firmsize.csv](#))

firmsize	label
0	All Firm Sizes
1	0-19 Employees
2	20-49 Employees
3	50-249 Employees
4	250-499 Employees
5	500+ Employees
N	Firm Size Not Available For Public-Sector Firms

6.6. ownercode

([label_ownercode.csv](#))

ownercode	label
A00	State and local government plus private ownership
A01	Federal government
A05	All Private

6.7. periodicity

([label_periodicity.csv](#))

periodicity	label
A	Annual data
Q	Quarterly data

6.8. quarter

([label_quarter.csv](#))

quarter	label
1	1st Quarter of the Year (January-March)
2	2nd Quarter of the Year (April-June)
3	3rd Quarter of the Year (July-September)
4	4th Quarter of the Year (October-December)

6.9. race

([label_race.csv](#))

race	label
A0	All Races
A1	White Alone
A2	Black or African American Alone
A3	American Indian or Alaska Native Alone
A4	Asian Alone
A5	Native Hawaiian or Other Pacific Islander Alone

race	label
A6	Some Other Race Alone (Not Used)
A7	Two or More Race Groups

6.10. seasonadj

([label_seasonadj.csv](#))

seasonadj	label
S	Seasonally adjusted
U	Not seasonally adjusted

6.11. sex

([label_sex.csv](#))

sex	label
0	All Sexes
1	Male
2	Female

6.12. Industry

6.12.1. Industry levels

([label_ind_level.csv](#))

ind_level	label
A	All Industries
S	NAICS Sectors
3	NAICS Subsectors
4	NAICS Industry Groups

6.12.2. Industry

([label_industry.csv](#))

Only a small subset of available values shown. The 2017 NAICS (North American Industry Classification System) is used for all years. QWI releases prior to R2018Q1 used the 2012 NAICS classification (see [Schema v4.1.3](#)). For a full listing of all valid 2017 NAICS codes, see <https://www.census.gov/cgi-bin/sssd/naics/naicsrch?chart=2017>.

industry	label	ind_level

6.13. Educational Institution

6.13.1. Institution Levels

([label_inst_level.csv](#))

Educational institutions are tabulated individually in the current data release. Future releases may aggregate to institutions to higher levels, such as state or Census Division.

inst_level	label
I	Institution
S	State of institution
D	Census division of institution
N	All institutions

6.13.2. Institution

([label_institution.csv](#))

Institution identifiers are sourced from the [U.S. Department of Education, Federal Student Aid office](#). This list has been supplemented with records for regional groupings of institutions.

institution	label	city	institution_state	inst_level	statefips
00137000	University of Colorado Boulder	Boulder	CO	I	08
00232500	University of Michigan	Ann Arbor	MI	I	26
00309000	Ohio State University	Columbus	OH	I	39
00332900	Pennsylvania State University (The)	University Park	PA	I	42
00389500	University of Wisconsin - Madison	Madison	WI	I	55
00955800	University of Texas	Austin	TX	I	48

6.14. Degree level

([label_degree_level.csv](#))

The degree levels are sourced from the [National Center for Education Statistics \(NCES\)](#), [Integrated Postsecondary Education Data System \(IPEDS\)](#).

degree_level	label
00	All Degree Levels
01	Certificate < 1 year
02	Certificate 1-2 years
03	Associates
04	Certificate 2-4 years
05	Baccalaureate
06	Post-Bacc Certificate
07	Masters
08	Post-Masters Certificate
17	Doctoral - Research/Scholarship
18	Doctoral - Professional Practice

6.15. Classification of Instruction Programs (CIP)

6.15.1. CIP levels

([label_cip_level.csv](#))

cip_level	label
A	All Degree Fields
2	2-Digit CIP Family
4	4-Digit CIP Codes
6	6-Digit CIP Codes

6.15.2. CIP code

([label_cipcode.csv](#))

CIP codes are sourced from the [National Center for Education Statistics \(NCES\)](#), [Integrated](#)

Postsecondary Education Data System (IPEDS). Data are reported using 2010 CIP codes, for all years. In 4-digit CIP tabulations, select degree levels are collapsed to the 2-Digit CIP family, using custom codes (e.g., 01.XX, 02.XX, etc.).

cipcode	label	CIPDefinition
00	All Instructional Programs	All CIP Codes
01	Agricultural/Animal/Plant/ Veterinary Science and Related Fields	Instructional programs that focus on agriculture, animal, plant, veterinary, and related sciences and that prepares individuals to apply specific knowledge, methods, and techniques to the management and performance of agricultural and veterinary operations.
01.00	Agriculture, General	Instructional content is defined in code 01.0000.
01.0000	Agriculture, General	A program that focuses on the general principles and practice of agricultural research and production and that may prepare individuals to apply this knowledge to the solution of practical agricultural problems. Includes instruction in basic animal, plant, and soil science; animal husbandry and plant cultivation; soil conservation; and agricultural operations such as farming, ranching, and agricultural business.
...		
01.8103	Large Animal/Food Animal and Equine Surgery and Medicine	A program that focuses on the scientific study of the internal medicine and invasive and noninvasive treatment of herd, work, sport, and food animals. Includes instruction in equine medicine, swine and dairy medicine, food animal medicine, pathophysiology, large animal diseases, large animal anesthesiology and surgical procedures, preoperative and postoperative care, and specific medical specialties such as dentistry, ophthalmology, oncology, obstetrics/theriogenology, and orthopedics.
01.8104	Small/Companion Animal Surgery and Medicine	A program that focuses on the scientific study of the internal medicine and invasive and noninvasive treatment of companion and household animals. Includes instruction in avian medicine, pet care, companion animal medicine, pathophysiology, small animal diseases, small animal anesthesiology and surgical procedures, preoperative and postoperative care, and specific medical specialties such as dentistry, ophthalmology, oncology, obstetrics/theriogenology, and orthopedics.

cipcode	label	CIPDefinition
01.8105	Veterinary Anatomy	A program that focuses on the scientific study of the structure of small and large animal cellular, organ, tissue, and body systems and their relation to physiologic function, disease, and therapeutic treatment. Includes instruction in histology, ultrastructure, molecular biology, biochemistry, developmental biology, neuroscience, electrophysiology, electron microscopy, computer imaging, and applications to specific species.
01.8106	Veterinary Infectious Diseases	A program that focuses on the scientific study of zoonotic infectious diseases, disease mechanisms, and prevention and treatment strategies. Includes instruction in disease pathogenesis, vector biology, mycobacterial infection, blood parasites, retroviruses, food-borne diseases, new infectious agents, ecotoxicology, mechanisms of disease transfer, antibody resistance, comparative pathology, communicable diseases, and disease prevention and eradication.
01.8107	Veterinary Microbiology and Immunobiology	A program that focuses on the scientific study of the microbial causation and immunologic processes related to animal disease, prevention, and treatment. Includes instruction in bacteriology, mycology, virology, immune response mechanisms, humoral and cell function, cancer defenses, immune system dysfunction, immunologic diseases, parasitology, pathogenesis, and disease vectors.
...		

6.16. Grad Cohort

grad_cohort is a 4-digit number representing the first year of the graduation cohort. The number of years in the cohort is reported in the separate [Grad Cohort Years](#) variable.

If **grad_cohort**=2010 and **grad_cohort_years**=3, then the cell includes graduates from 2010, 2011, and 2012.

When tabulating across all cohorts, the value **0000** will be used for **grad_cohort**.

6.17. Grad Cohort Years

grad_cohort_years is the number of years in the cohort of reference (see [Grad Cohort](#)). It varies by [Degree level](#). Bachelor's degrees (05) are reported in 3 year cohorts, all other degrees are reported in 5 year cohorts. The **grad_cohort_years** will take a value (3,5). As tabulations are not done across degree types, the appropriate value will be reported in **grad_cohort_years** when **grad_cohort**=0000.

6.18. Geography

6.18.1. Geographic levels

Geography labels for data files are provided in separate files, by scope. Each file 'label_geography_SCOPE.csv' may contain one or more types of records as flagged by [geo_level](#). For convenience, a composite file containing all geocodes is available as [label_geography.csv](#). The 2019 vintage of [Census TIGER/Line geography](#) is used for all tabulations as of the R2020Q1 release.

Shapefiles are described in a [separate document](#).

([label_geo_level.csv](#))

geo_level	label	description
B	Metropolitan (complete)	Identifies 5-digit CBSA code for metropolitan areas provided by the Census Bureau's Geography Division. Balance of state including micropolitan areas are identified by custom codes as [ST]999
C	Counties	Identifies 5-digit FIPS/ANSI code for counties
D	Divisions	Identifies 1-digit multi-state Census Divisions
M	Metropolitan/Micropolitan (state part)	Identifies 7-digit code constructed from the 2-digit state FIPS code and the 5-digit CBSA code provided by the Census Bureau's Geography Division
N	National (50 States + DC)	Custom code using '00' to denote national scope
S	States	Identifies 2-digit FIPS/ANSI codes
W	Workforce Investment Areas	2-digit state FIPS code and the 6-digit WIA identifier provided by LED State Partners

6.18.2. National and state-level values

([label_fipsnum.csv](#))

The file [label_fipsnum.csv](#) contains values and labels for all entities of [geo_level](#) 'N' or 'S', and is a

summary of separately available files.

geography	label	geo_level
00	National (50 States + DC)	N
01	Alabama	S
02	Alaska	S
04	Arizona	S
05	Arkansas	S
06	California	S
08	Colorado	S

6.18.4. Detailed state and substate level values

Files of type 'label_geography_[ST].csv' will contain identifiers and labels for geographic areas entirely comprised within a given state '[ST]'. State-specific parts of cross-state CBSA, in records of type [geo_level](#) = M, are present on files of type 'label_geography_[ST].csv'. The file [label_geography_metro.csv](#) contains labels for records of type [geo_level](#) = B, for metropolitan areas only.

6.19. Aggregation level

6.19.1. J2J

([label_agg_level.csv](#))

Measures within the J2J and QWI data products are tabulated on many different dimensions, including demographic characteristics, geography, industry, and other firm characteristics. For Origin-Destination (O-D) tables, characteristics of the origin and destination firm can be tabulated separately. Every tabulation level is assigned a unique aggregation index, represented by the `agg_level` variable. This index starts from 1, representing a national level grand total (all industries, workers, etc.), and progresses through different combinations of characteristics. There are gaps in the progression to leave space for aggregation levels that may be included in future data releases.

agg_level is currently reported only for J2J data products.

The following variables are included in the [label_agg_level.csv](#) file:

Variable	Description
agg_level	index representing level of aggregation reported on a given record
worker_char	demographic (worker) characteristics reported on record
firm_char	firm characteristics reported on record. These will be the characteristics of the destination firm in O-D tabulations
firm_orig_char	characteristics of origin firm reported on record (O-D tabulations only)
j2j	Flag: Aggregation level available on J2J counts tables
j2jr	Flag: Aggregation level available on J2J rates tables
j2jod	Flag: Aggregation level available on J2J O-D tables
qwi	Flag: Aggregation level available on QWI

The characteristics available on an aggregation level are repeated using a series of flags following the standard schema:

- [cip_level](#) - degree field reporting level of table
- [inst_level](#) - institution reporting level of table

- [geo_level](#) - geographic level of table
- [ind_level](#) - industry level of table
- [by_variables](#) - flags indicating other dimensions reported, including ownership, demographics, firm age and size.

A shortened representation of the file is provided below, the complete file is available in the link above.

agg_level	worker_char	firm_char	firm_orig_char	j2j	j2jr	j2jod	qwi	geo_level
1				1	1	1	0	N
2	Sex			1	1	1	0	N
3	Age			1	1	1	0	N
4	Sex * Age			1	1	1	0	N
5	Race			1	1	1	0	N
9	Ethnicity			1	1	1	0	N
13	Race * Ethnicity			1	1	1	0	N
...								
129		Firm Size		1	1	1	0	N
257		NAICS Sector		1	1	1	0	N
258	Sex	NAICS Sector		1	1	1	0	N
...								
1029	Race	State		1	1	1	0	S
1033	Ethnicity	State		1	1	1	0	S
1037	Race * Ethnicity	State		1	1	1	0	S
...								

6.19.2. PSEO

([label_agg_level_pseo.csv](#))

Measures within the PSEO data product can be tabulated by characteristics of the graduate (e.g., institution attended, instructional program, degree level, etc.) and by characteristics of employment (state, industry). All measures may not be available on all levels of aggregation - for example, earnings variables may not be available when tabulating by place and industry of work, though counts are. Every tabulation level is assigned a unique aggregation index, represented by the `agg_level_pseo`

variable. This index starts from 1, representing a national level grand total (all institutions, graduates, industries, etc.), and progresses through different combinations of characteristics. There are gaps in the progression to leave space for aggregation levels that may be included in future data releases. Aggregation levels that are available in the PSEO release will be flagged.

The following variables are included in the [label_agg_level_pseo.csv](#) file:

Variable	Description
agg_level_pseo	index representing level of aggregation reported on a given record
grad_char	Characteristics of graduate and program
firm_char	Characterstics of place of employment
pseoe	Flag: aggregation level available on PSEO Earnings
pseof	Flag: aggregation level available on PSEO Flows

The characteristics available on an aggregation level are repeated using a series of flags following the standard schema:

- [inst_levels](#) - institution level of table
- [geo_level](#) - geographic level of table
- [ind_level](#) - industry level of table
- by_ variables - flags indicating other dimensions reported, including ownership, demographics, firm age and size.

agg_level_pseo	grad_char	firm_char	cip_level	inst_level	geo_level	ind_level	by_grad_cohort	by_degree_level	pseoe	pseof
38	Degree Level * Institution ID		A	I	N	A	0	1	1	1
40	Degree Level * CIP 2-digit * Institution ID		2	I	N	A	0	1	1	1
42	Degree Level * CIP 4-digit * Institution ID		4	I	N	A	0	1	1	0

agg_level_pseo	grad_char	firm_char	cip_level	inst_level	geo_level	ind_level	by_grad_cohort	by_degree_level	pseo_e	pseo_f
44	Degree Level * Start Year for Graduation Cohort * Institution ID		A	I	N	A	1	1	1	1
...										
188	Degree Level * Start Year for Graduation Cohort * Institution ID	NAICS Sector * Census Division	A	I	D	S	1	1	0	1
190	Degree Level * CIP 2-digit * Start Year for Graduation Cohort * Institution ID	NAICS Sector * Census Division	2	I	D	S	1	1	0	1
192	Degree Level * CIP 4-digit * Start Year for Graduation Cohort * Institution ID	NAICS Sector * Census Division	4	I	D	S	1	1	0	0
...										
188	Degree Level * Start Year for Graduation Cohort * Institution ID	NAICS Sector * Census Division	A	I	D	S	1	1	0	1
190	Degree Level * CIP 2-digit * Start Year for Graduation Cohort * Institution ID	NAICS Sector * Census Division	2	I	D	S	1	1	0	1

agg_level_pseo	grad_char	firm_char	cip_level	inst_level	geo_level	ind_level	by_grad_cohort	by_degree_level	pseo_e	pseo_f
192	Degree Level * CIP 4-digit * Start Year for Graduation Cohort * Institution ID	NAICS Sector * Census Division	4	I	D	S	1	1	0	0
...										

7. Status Flags

([label_flags.csv](#))

Most indicators in the LEHD data products have associated status flags. Each status flag in the tables above contains one of the following valid values. The values and their interpretation are listed in the tables below. Unless otherwise specified in this section, a status flag will take the values described in 7.1 Standard Status Flags.

7.1. Standard Status Flags

Important

Note: Currently, the J2J and PSEO tables only contain status flags '-1', '1', '5'. Status flags with values 10 or above only appear in online applications, not in CSV files.

flag	label
-2	no data available in this category for this quarter
-1	data not available to compute this estimate
1	OK
5	Value suppressed because it does not meet US Census Bureau publication standards.
6	Value calculated from other released measures - no significant distortion
7	Value calculated from other released measures - some of which have significantly distorted data
9	Data significantly distorted - fuzzed value released
10	Aggregate of cells - no significant distortion
11	Aggregate of cells not released because component cells do not meet U.S. Census Bureau publication standards
12	Aggregate of cells - some of which have significantly distorted data

7.2. IPEDS Count Status Flag

([label_flags_ipeds_count.csv](#))

Graduate counts are provided from public use data from the [Integrated Postsecondary Education Data System \(IPEDS\)](#). Counts are linked to graduation cohorts in the PSEO data and included in the PSEO tables. In a small number of cases, misalignment in programs (CIPCODE) is observed between the

IPEDS and PSEO counts. In these cases, the IPEDS counts adjusted to be consistent with those on PSEO, and the count is flagged accordingly.

flag	label
1	IPEDS counts as reported
2	IPEDS counts edited for consistency with PSEO categories
3	IPEDS counts not available

8. Metadata

([variables_version.csv](#))

8.1. Version Metadata for QWI, J2J, and PSEO Files (version.txt)

Each data release is accompanied by one or more files with metadata on geographic and temporal coverage, in a compact notation. These files follow the following naming convention:

version_[type].txt

where each component is described in more detail in [lehd_csv_naming.pdf](#).

The contents contains the following elements:

Component	Source	Description
product	[type]	Type as described in lehd_csv_naming.pdf
fas	[fas]	(optional - concatenated with product) used for QWI to distinguish separate tabulations from the legal [fas] values as described in lehd_csv_naming.pdf
geo	[stusps] or METRO	Covered [geography] (uppercase state postal code including entire nation or the word METRO)
geonum	[geography]	Numeric geography code
start	yyyy:q (QWI, J2J) yyyy (PSEO)	Start year and quarter
end	yyyy:q (QWI, J2J) yyyy (PSEO)	End year and quarter
schema	Vx.y.z	Version of the schema
release	RyyyyYq	Release quarter (identifies when the data was created)
internal	various	Internal identifier used for provenance tracking

For instance, the metadata for the latest_release QWI release of Delaware (obtained from [here](#)) has the following content:

```
QWI_F DE 10 1998:3-2019:3 V4.6.0 R2020Q2 qwipu_de_20200416_0913
QWI_FA DE 10 1998:3-2017:4 V4.6.0 R2020Q2 qwipu_de_20200416_0913
QWI_FS DE 10 1998:3-2017:4 V4.6.0 R2020Q2 qwipu_de_20200416_0913
```

Similarly, the metadata for the latest_release release of Delaware J2J tabulations (obtained from [here](#)) has the following content:

```
J2J DE 10 2000:2-2019:2 V4.6.0 R2020Q2 j2jpu_de_20200620_0943
```

Some J2J metadata may contain multiple lines, as necessary.

The PSEO metadata will contain separate lines for the PSEOE and PSEOF tables. The year range for PSEO tables is based on the [Grad Cohort](#), the start year of the graduation cohort. An example for Colorado institutions has the following content:

```
PSEOE CO 08 2001-2015 V4.5.0 2019Q1 pseopu_co_20190617_0839
PSEOF CO 08 2001-2015 V4.5.0 2019Q1 pseopu_co_20190617_0839
```

8.2. Additional Metadata for J2JOD Files (avail.csv)

([variables_avail.csv](#))

Because the origin-destination (J2JOD) data link two regions, we provide an auxiliary file with the time range that cells containing data for each geographic pairing may appear in a data release.

variable	type	label
geo_level	Char(1)	Geographic level of destination region
geography	Char(8)	Geography code of destination region
geo_level_orig	Char(1)	Geographic level of origin region
geography_orig	Char(8)	Geography code of origin region
start_year	Num	First year regional pair may be observed
start_quarter	Num	First quarter regional pair may be observed
end_year	Num	Last year regional pair may be observed
end_quarter	Num	Last quarter regional pair may be observed

The reference region will always be either the origin or the destination. National tabulations contain records where both origin and destination are [geo_level=N](#); state tabulations contain records where [geo_level](#) in (N,S); metro tabulations contain records where [geo_level](#) in (N,S,B). Data may be suppressed for certain combinations of regions and quarters because the estimates do not meet Census Bureau publication standards.

8.3. Metadata on Indicator Availability

([variables_lags.csv](#))

Each [Indicator](#) potentially requires leads and/or lags of data to be computed, and thus may not be available for certain time periods. Only two QWI will be available for all quarters of the time span described by start and end in the [version.txt](#) files: EmpTotal and Payroll. The date range for QWI, QWIR, J2J, and J2JR can be found in [version.txt](#); the date range for J2JOD can be found in [avail.csv](#).

For each indicator, the following files contain the quarters of data required to be available relative to the overall date range described in the metadata for the release:

- [lags_qwi.csv](#)
- [lags_j2j.csv](#)

The files are structured as follows:

variable	type	label
Indicator Variable	Num	Name of the Indicator
Quarters_Required_Prior	Num	Number of quarters of data required to compute indicator relative to start quarter
Quarters_Required_Subsequent	Num	Number of quarters of data required to compute indicator relative to end quarter

9. Changes

For a description of how schema files are versioned, see [main directory](#).

9.1. This version (revisions)

- 2020-06-26: Initial release

9.2. Version 4.7.0 from 4.6.0 and 4.5.0-draft

- Merge PSEO schema files into official release version
- Minor formatting changes

This revision: Mon 29 Jun 2020 05:03:17 PM EDT
